I feel that XM Satellite Radio should be allowed to continue to broadcast local Traffic and Weather. The convenience of having "On Demand" traffic and weather reports is a valuable service for which I gladly pay XM Satellite Radio. With local radio programming I have to wait until, or hope I am traveling during, such broadcasts, but with XM it is available, and should be, whenever it is necessary for me to listen to such broadcasts. Not only is this a convenience, but in my opinion it is a valuable safety tool while I am driving. Please reject NAB petition 04-160 so XM Satellite Radio can continue to provide the content I choose to pay for.
Thank You,

Ronald R Reppucci
